Our Lab staff and new machine 😊

March 2021

Sooo Thankful for the laboratory at OCC

"Shikamoo Mzee. How was your day? I would like to inform you that now we can test: PSA: HDL: Cholesterol: T4: T3: TSH: HbA1C: C-Reactive Protein, at our clinic. It's a FIA Meter, a fluorescence immunochromatographic analysing system which can help Diagnose conditions such as infection diabetes, cardiovascular diseases , renal injury and cancers, etc..." This was a wonderful message which I received from Dr. Byemba after the purchase of the FIA meter for the lab. The clinic continues to expand its services through the lab and the dedicated staff.

First things first... After checking in, the first step in the procedure for treatment is the vital signs station. BP, heartrate, and temperature.

It's a FIA Meter, a fluorescence immunochromatographic analysing system which can help Diagnose various conditions

Dr. Byemba does community health education announcements and mini seminars from time to time in the waiting area of the lab

March 2021: Patients – **1,900**

Minor Surgeries – **39**

Ultrasounds – **208**

X-Rays – **78**

Prayer requests:

- Our Tax situation has not changed. We need your prayers for this unjust financial attack.
- For the ability to do a mobile clinic in 2021
- We are facing drainage and sewer issues this year with the good rainy season. Pictured below are workers digging the new system.

Blessings and answered prayers:

- Laptops and a desktop were purchased this month. Thanks once again Monterey Baptist Church!!! 😊
- The FIA meter was also purchased this month.
- Christ is being glorified through the Christian care and love given at OCC.

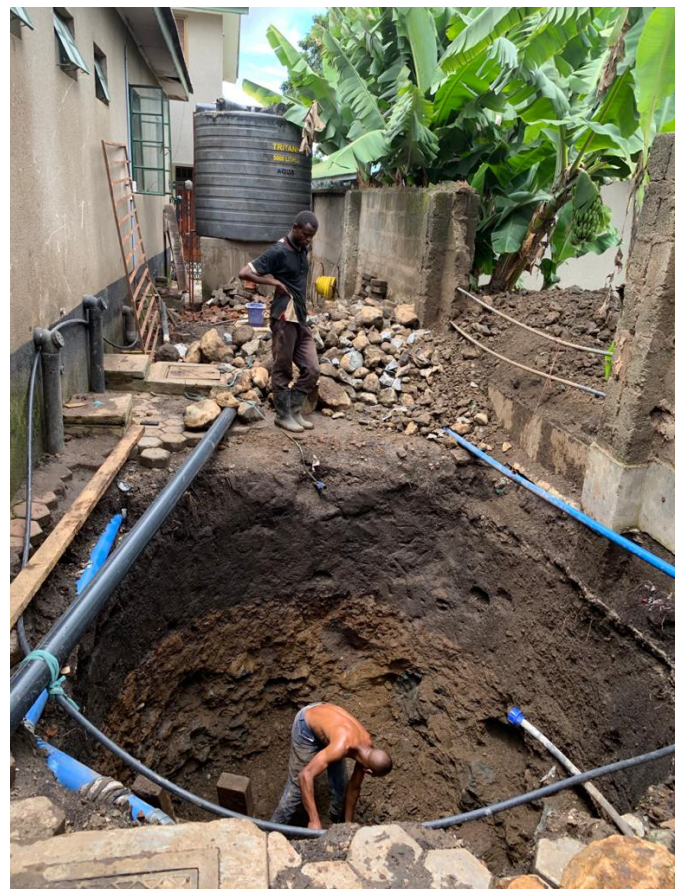

One of the new laptops and printer

The new Desktop in the Exray room

Getting a new sewer

Its gonna be great ☺

**Remember... "We couldn't do what we do, if you didn't do what you do!"
*Dr. and Mrs. Byemba / The Smiths / OCC Staff***
